

Your net zero journey is our purpose

We are a global decarbonisation platform, providing comprehensive end-to-end solutions to help customers achieve their emissions reductions goals.

Innovation is at the core of what we do.

We develop decarbonisation strategies for our customers throughout the various stages of their net zero journeys.

Customers can acquire Renewable Energy Certificates (RECs), carbon credits and leverage our proprietary technology platform for energy asset management.

Backed by SGX-listed Sembcorp Industries.

We help you to connect the dots in your net zero journey

Measure and report

Leverage tools to track and communicate your climate journey with confidence

Renewable Energy Certificates (RECs)

Support the transition to renewables and demonstrate your climate commitment

Carbon credits

Compensate for unavoidable emissions; fund the voluntary carbon market

Marketplace

Trade carbon credits and RECs and match projects with business needs

Sell with us

Access a global network of buyers of environmental attributes on our platform

NetZero Platform

Find digital solutions to manage environmental attributes, or to optimise your energy assets

24/7 hourly matching

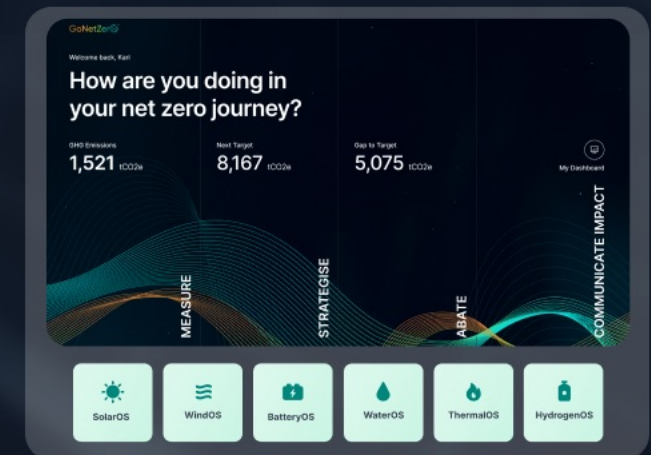

Get near real-time data to match renewable energy generation and consumption

A data-driven approach addressing the needs of every level of your organisation

Benefits

- Integrated overview by monitoring and benchmarking performance of energy sites in real-time
- Reduce losses through condition monitoring and by identifying and anticipating asset failure
- Improve operation & maintenance through corrective action recommendation and ticket management
- Improve equipment health through analytics and long term trending

NetZeroOS is our proprietary smart energy asset management platform designed to empower renewable energy asset owners to manage, optimise and scale their assets

Our customers

We serve a diverse range of customers ranging from government agencies, MNCs, RE100 members, data centres, financial institutions and more.
