

A company's success is defined by its ability to deliver sustainable earnings and growth to its shareholders, as well as value-added quality products and services to its customers. Supported by competent staff passionate about their work, a successful company is a leader in its own right.

SembCorp Industries is a leading player in infrastructure services in Asia, providing integrated industrial site services (power, gas, steam, water and other site services), process engineering and environmental management services to industrial customers in Singapore and the region. We are also Asia's largest integrated logistics provider, offering advanced IT-enhanced supply chain management solutions to our global customers; and a leading global marine engineering group specialising in ship repair and conversion, newbuilds, and offshore engineering services.

Our ongoing efforts to provide these essential, innovative, multi-functional outsourced solutions to our customers – MNCs and leading local companies – have placed us in good stead to extend our reach outside Singapore and to establish our presence in fast-growing global markets, including China and India.

Our management team is fully charged and ready to embark on this journey to add more value to our customers and generate greater returns for our shareholders.
