

Climate Roadmap and Journey

Committed to sustainability: setting key targets for the next phase of growth

Key actions:

1. Grow renewables
2. Reduce emissions
3. Invest in low-carbon initiatives

2018

First Singaporean energy company to publish a climate strategy

2021

Set 2025, 2030 and 2050 climate action targets

2023

Set 2028 climate action targets

2025

Targets
(set in 2021)

Renewables¹

10GW

Emissions intensity²

0.40

tCO₂e/MWh aligned with well below 2°C pathway

2028

Targets
(set in 2023)

Renewables¹

25GW

Emissions intensity²

0.15

tCO₂e/MWh aligned with 1.5°C pathway

2030

Target
(set in 2021)

Absolute emissions²

2.7

mtCO₂e

aligned with 1.5°C pathway

2050

Target to achieve net zero

GW: gigawatt tCO₂e/MWh: tonnes of carbon dioxide equivalent per megawatt-hour mtCO₂e: million tonnes of carbon dioxide equivalent

¹ Gross installed renewable energy capacity

² Emissions intensity and absolute emission targets cover Scope 1 (direct emissions) from energy generation, and Scope 2 (indirect emissions) from energy consumption
